Encouraging the participation of women and young people in business is an integral part of SBEP's activities, with a particular focus on women in the Polog region. The project aims to proactively</p>	USAID Project for development of small businesses, Municipality of Bogovinje, Ecolog International

		<p>seek realistic market opportunities where women are more likely to engage as employees and / or entrepreneurs. More specifically, Women in Business Initiatives offer direct assistance to small-business women businesses and facilitate networking opportunities among women entrepreneurs. Another example of the project approach is the rural women's training activities that live in remote mountain villages in wild plant collection, providing them with a real economic opportunity compared to the soft masses usually advanced by targeted programs by donors. In the previous period, the Association for Local Rural Development conducted a study of the existing and potential economic activities of women in the Polog region. Specifically, the scope of activities included:</p> <p>Active women's business identification in the selected region with a special focus on women-owned businesses that employ women in their supply chain.</p> <p>Identifying existing and potential new value chains between companies in the region for the involvement of women suppliers;</p> <p>Proactive support for increased business ownership by women through direct</p>
